###### *Additional capital purchase in a subsidiary*

On 01 June 2018, the Group purchased an additional 219,200 shares of Tay Do Cement Joint Stock Company, increasing its capital holding ratio in this company to 51.06%. The purpose of purchasing additional shares of Tay Do Cement Joint Stock Company is to control the operations of this Company

On 01 January 2020, the Group also acquired an additional 44.5% of shares of Tay Do Cement Media Joint Stock Company, increasing its capital contribution ratio in this subsidiary to 63.5% from this date. The additional purchase price was paid in cash to non-controlling shareholders. The carrying value of the net assets of Tay Do Cement Media Joint Stock Company (excluding goodwill) at the acquisition date was VND 2,322,139,189, and the carrying value of the additional ownership interest was VND 667,500,000. The difference between the purchase price and the carrying value of the additional ownership interest was recorded in the item “Undistributed earnings after tax” on the Consolidated Balance Sheet. After the date of controlling the subsidiary, the parent company continued to invest in the subsidiary 27,000 shares, equivalent to 27%. As of the end of the fiscal year, the Parent Company held 90,500 shares, equivalent to 90.5% of the charter capital (the beginning of the year balance was 19,000 shares, equivalent to 19% of the charter capital).

On July 1, 2020, the Group also purchased an additional 20.52% of the shares of Tay Do Cement Transport Joint Stock Company. In addition, Tay Do Concrete Joint Stock Company's ownership in Tay Do Cement Transport Joint Stock Company is 21.78%, so the interest rate at this time is 86.77%. The additional purchase price is paid in cash to non-controlling shareholders. The book value of Tay Do Cement Media Joint Stock Company's net assets (excluding goodwill) at the acquisition date was VND 30,513,711,349, and the book value of the additional ownership interest was VND 4,184,800,000. The difference between the purchase price and the book value of the additional ownership interest was recorded in the item "Retained earnings after tax" on the Consolidated Balance Sheet. After the date of controlling the subsidiary, the parent company continued to invest in the subsidiary 26,800 shares, equivalent to 1.07%. At the end of the fiscal year, the Group held 2,257,600 shares, equivalent to an interest rate of 87.85% (the beginning of the year balance was 742,000 shares, equivalent to 29.68% of the charter capital).

##### I.5b Subsidiary consolidated

*Starting in 2020, Tay Do Cement Joint Stock Company will prepare consolidated financial statements using the equity method with the following subsidiaries*

###### **Company name**

1/1/2020 - Tay Do Cement Media Joint Stock Company

1/7/2020 - Tay Do Cement Transport Joint Stock Company

##### I.6 Statement on Comparability of Information in Consolidated Financial Statements

The corresponding figures of the previous period are comparable with the figures of the current period

## **I.7 Employees**

At the end of the quarter, the Group had 610 employees working at the Group's companies (687 employees at the beginning of the year)

## **II- FISCAL YEAR, CURRENCY USED IN ACCOUNTING**

### **II.1 Fiscal year**

The Group's fiscal year begins on January 1 and ends on December 31 each year.

### **II.2 Currency used in accounting**

The currency used in accounting is VND as most transactions are performed in VND.

## **III- ACCOUNTING STANDARDS AND CONVENTION APPLIED**

### **III.1 Applied accounting standards**

The Group applies Vietnamese Accounting Standards, Vietnamese Enterprise Accounting Standards issued under Circular No. 200/2014/TT-BTC dated 22 December 2014 guiding the Enterprise Accounting Standards, Circular No. 202/2014/TT-BTC dated 22 December 2014 guiding the preparation and presentation of Consolidated Financial Statements and other circulars guiding the implementation of accounting standards of the Ministry of Finance in the preparation and presentation of Consolidated Financial Statements

### **III.2 Statement on compliance with accounting standards and accounting standards**

The Board of Directors ensures that it has complied with the requirements of Vietnamese Accounting Standards, Vietnamese Enterprise Accounting Standards issued under Circular No. 200/2014/TT-BTC dated 22 December 2014, Circular No. 202/2014/TT-BTC dated 22 December 2014 as well as other circulars guiding the implementation of accounting standards of the Ministry of Finance in the preparation and presentation of the Consolidated Financial Statements

## **IV- ACCOUNTING POLICIES APPLIED**

### **IV.1 Basis of preparation of consolidated financial statements**

The consolidated financial statements are prepared using the accrual basis of accounting (except for cash flow information)

### **IV.2 Basis of consolidation**

The consolidated financial statements include the financial statements of the parent company and the financial statements of the subsidiary. A subsidiary is an entity controlled by the parent company. Control exists when the parent company has the power, directly or indirectly, to govern the financial and operating policies of a subsidiary so as to obtain benefits from its activities. In determining control, potential voting rights arising from call options or debt and equity instruments that are convertible into common shares at the balance sheet date are taken into account.

The results of operations of subsidiaries acquired or sold during the period are presented in the Consolidated Statement of Operations from the date of acquisition or up to the date of disposal of the investment in the subsidiary

The financial statements of the parent company and the subsidiary used for consolidation are prepared for the same accounting period and apply uniform accounting policies for like transactions and events in similar circumstances. In cases where the accounting policies of a subsidiary differ from those applied consistently in the Group, the Financial Statements of the subsidiary will be appropriately adjusted before being used for the preparation of the Consolidated Financial Statements.

Balances of accounts in the Balance Sheet between companies in the same Group, intra-group transactions, unrealized intra-group profits arising from these transactions must be eliminated in full. Unrealized losses arising from intra-group transactions are also eliminated unless the costs creating such losses are not recoverable.

Non-controlling interests represent the portion of the profits or losses in the results of operations and net assets of a subsidiary not held by the Group and are presented in a separate line item in the consolidated income statement and in the consolidated balance sheet (as part of equity). Non-controlling interests consist of the amount of the non-controlling interests at the date of the original business combination and the non-controlling interest in changes in equity since the date of the combination. Losses incurred by the subsidiary are allocated to the non-controlling interest in proportion to the non-controlling interest, even if such losses exceed the non-controlling interest in the net assets of the subsidiary.

### **IV.3 Foreign currency transactions**

Transactions in foreign currencies are translated at the exchange rate on the date of the transaction. The balance of foreign currency monetary items at the end of the accounting period is translated at the exchange rate on that date

Exchange rate differences arising during the period from foreign currency transactions are recorded in financial income or financial expenses. Exchange rate differences arising from revaluation of foreign currency monetary items at the end of the accounting period after offsetting the increase and decrease are recorded in financial income or financial expenses.

The exchange rate used to translate foreign currency transactions is the actual exchange rate at the time of the transaction. The actual exchange rate for foreign currency transactions is determined as follows

- For foreign currency purchase and sale contracts (spot foreign currency purchase and sale contracts, forward contracts, futures contracts, options contracts, swap contracts): the exchange rate signed in the foreign currency purchase and sale contract between the Group and the bank.
- For capital contributions or capital contributions: the foreign currency purchase rate of the bank where the Group opens an account to receive capital from investors on the date of capital contribution.
- For receivables: the foreign currency purchase rate of the commercial bank where the Group designates the customer to make payment at the time the transaction occurs.
- For payables: the foreign currency sale rate of the commercial bank where the Group plans to transact at the time the transaction occurs.
- For asset purchases or expenses paid immediately in foreign currency (not through payable accounts): foreign currency buying rate of the commercial bank where the Group makes the payment.

The exchange rate used to re-evaluate the balance of foreign currency items at the end of the accounting period is determined according to the following principles:

- For foreign currency deposits at banks: foreign currency buying rate of the bank where the Group opens a foreign currency account.
- For foreign currency items classified as other assets: foreign currency buying rate of Vietnam Joint Stock Commercial Bank for Industry and Trade - Can Tho Branch (the Group's regular transaction bank).
- For foreign currency items classified as liabilities: foreign currency selling rate of Vietnam Joint Stock Commercial Bank for Industry and Trade - Can Tho Branch (the Group's regular transaction bank).

#### **IV.4 Cash and cash equivalents**

Cash includes cash and demand bank deposits.

#### **IV.5 Financial investments**

##### ***Trading securities***

Investments are classified as trading securities when they are held for the purpose of trading for profit.

Trading securities are recorded in the accounting books at cost. The cost of trading securities is determined based on the fair value of the payments at the time of the transaction plus the costs related to the purchase of trading securities.

The time of recording trading securities is the time when the Group has ownership, specifically as follows:

- For listed securities: recorded at the time of order matching (T+0).
- For unlisted securities: recorded at the time of official ownership according to the provisions of law.

Interest and dividends of the years before the trading securities are purchased are accounted for as a reduction in the value of the trading securities themselves. Interest and dividends of the years after the trading securities are purchased are recorded as revenue.

Exchangeable shares are determined at fair value on the exchange date. The fair value of shares is determined as follows:

- For shares of listed companies, the fair value of the shares is the closing price listed on the stock market on the exchange date. In case the stock market is not trading on the exchange date, the fair value of the shares is the closing price of the previous trading session adjacent to the exchange date.
- For unlisted shares traded on the UPCOM, the fair value of the shares is the closing price of the UPCOM on the exchange date. In case the UPCOM is not trading on the exchange date, the fair value of the shares is the closing price of the previous trading session adjacent to the exchange date.
- For other unlisted shares, the fair value of the shares is the price agreed by the parties according to the contract or the book value at the time of exchange.

The provision for devaluation of trading securities is made for each type of securities traded on the market and has a fair value lower than the original price. The fair value of trading securities is determined as follows:

- For securities listed on the stock market: closing price on the most recent trading day up to the end of the fiscal year.
- For shares registered for trading on the trading market of unlisted public companies and state-owned enterprises equitized in the form of public offering of securities (UPCOM): average reference price in the 30 most recent consecutive trading days before the end of the fiscal year announced by the Stock Exchange.

Increase or decrease in the amount of provision for devaluation of trading securities that must be set up at the end of the fiscal year *financial expenses*

Gains or losses from the transfer of trading securities are recorded in financial revenue or financial expenses. Cost of goods sold is determined by the first-in, first-out method.

#### ***Held-to-maturity investments***

Investments are classified as held-to-maturity when the Group has the intention and ability to hold them until maturity. Held-to-maturity investments include: term deposits, bonds.

Held-to-maturity investments are initially recorded at cost, which includes the purchase price and any transaction costs incurred in connection with the purchase of the investments. After initial recognition, these investments are measured at their recoverable amount. Interest income from held-to-maturity investments after the acquisition date is recognized in the Income Statement on an accrual basis. Interest earned before the Group holds the investments is deducted from the cost at the acquisition date.

When there is strong evidence that part or all of an investment may not be recovered and the amount of loss can be reliably determined, the loss is recorded in financial expenses in the period and the investment value is directly deducted.

#### ***Investments in equity instruments of other entities***

Investments in equity instruments of other entities include investments in equity instruments but the Group does not have control, joint control or significant influence over the investee.

Investments in equity instruments of other entities are initially recorded at cost, including the purchase price or capital contribution plus costs directly related to the investment activities. Dividends and profits from periods before the investment is purchased are recorded as a reduction in the value of that investment. Dividends and profits from periods after the investment is purchased are recorded as revenue. Dividends received in shares are only tracked by the number of shares increased, not recording the value of shares received.

Provision for losses on investments in equity instruments of other entities is made as follows:

- For investments in listed shares or the fair value of the investment is reliably determined, the provision is made based on the market value of the shares.
- For investments whose fair value cannot be determined at the reporting date, the provision is made based on the loss of the investee with the provision equal to the difference between the actual capital contribution of the parties at the other entity and the actual equity multiplied by the capital contribution ratio of the Group compared to the total actual capital contribution of the parties at the other entity.

Increases and decreases in the provision for losses on investments in equity instruments of other entities that need to be made at the end of the accounting period are recorded in financial expenses.

### **IV.6 Receivables**

Receivables are presented at book value less provisions for doubtful debts.

The classification of receivables as trade receivables and other receivables is made according to the following principles:

- Trade receivables reflect commercial receivables arising from purchase-sale transactions between the Group and buyers who are independent entities of the Group, including receivables for export sales entrusted to other entities.
- Other receivables reflect non-commercial receivables not related to purchase-sale transactions.

Provision for doubtful debts is made for each doubtful debt based on the age of the debt or the expected level of loss that may occur, specifically as follows:

- For overdue receivables:
  - 30% of the value for receivables overdue from more than 6 months to less than 1 year.
  - 50% of the value for receivables overdue from 1 year to less than 2 years.
  - 70% of the value for receivables overdue from 2 years to less than 3 years.
  - 100% of the value for receivables overdue from 3 years or more.
- For receivables that are not overdue but are unlikely to be recovered: based on the expected loss level to establish a provision.

· Increases or decreases in the balance of the provision for doubtful debts that must be set up at the end of the fiscal year are recorded in the business management expenses.

#### **IV.7 Inventory**

Inventories are stated at the lower of cost and net realizable value.

The cost of inventories is determined as follows:

- Raw materials, goods: includes the cost of purchase and other directly related costs incurred in bringing the inventories to their present location and condition.
- Work in progress: includes only the cost of main raw materials.
- Finished goods: includes the cost of raw materials, direct labor and directly related general production costs allocated based on the normal level of activity.

The cost of goods sold is calculated by the weighted average method and accounted for by the regular declaration method.

Net realizable value is the estimated selling price of inventories in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to consume them.

Provision for inventory devaluation is established for each inventory item whose original cost is greater than its net realizable value. Increases or decreases in the balance of provision for inventory devaluation that must be established at the end of the accounting period are recorded in cost of goods sold.

#### **IV.8 Prepaid expenses**

Prepaid expenses include actual expenses that have been incurred but are related to the results of production and business activities of many accounting periods. The Group's prepaid expenses are mainly accounting software costs, prepaid land rentals and tools and equipment costs. These prepaid expenses are allocated over the prepaid period or the period in which the corresponding economic benefits are generated from these expenses.

##### *Accounting software costs*

Accounting software costs that arise once with a large value are allocated to expenses on a straight-line basis over 03 years.

##### *Tools and equipment*

Tools and equipment that have been put into use are allocated to expenses on a straight-line basis over an allocation period of no more than 03 years

##### *Fixed asset repair costs*

Fixed asset repair costs that arise once with a large value are allocated to expenses on a straight-line basis over 03 years.

##### *Insurance expenses*

One-time insurance expenses of large value are allocated to expenses on a straight-line basis over 01 year

#### **IV.9 Operating lease**

A lease is classified as an operating lease if the lessor retains substantially all the risks and rewards incidental to ownership of the asset. Operating lease costs are recognized as expenses on a straight-line basis over the lease term, regardless of the method of payment.

#### **IV.10 Tangible fixed assets**

Tangible fixed assets are stated at cost less accumulated depreciation. The cost of tangible fixed assets includes all costs incurred by the Group to acquire the fixed assets up to the date the asset is ready for use. Expenditures incurred after initial recognition are recognized as an increase in the cost of fixed assets only if it is certain that these costs will result in an increase in future economic benefits from the use of the asset. Expenditures that do not satisfy the above conditions are recognized as production and business expenses in the period.

When tangible fixed assets are sold or disposed of, their cost and accumulated depreciation are removed from the accounts and any gain or loss resulting from their disposal is recognised as income or expense in the period.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives. The depreciation years for various types of tangible fixed assets are as follows:

<b><u>Type of fixed asset</u></b>	<b>No. of years</b>
Building and structures	05-30
Machinery and equipment	02-20
Motor vehicles	04-12
Office equipment	03-08
Other assets	04

#### **IV.11 Intangible fixed assets**

Intangible fixed assets are stated at cost less accumulated depreciation

The cost of an intangible fixed asset comprises all costs incurred by the Group to acquire the fixed asset up to the date when the asset is ready for use. Expenditures relating to intangible fixed assets incurred after initial recognition are recognised as operating expenses in the period, unless they are directly attributable to a specific intangible fixed asset and result in an increase in the economic benefits derived from the asset.

When an intangible fixed asset is sold or disposed of, its cost and accumulated depreciation are written off and any gain or loss arising from its disposal is recognised as income or expense in the period.

The Group's intangible fixed assets include:

##### **\* Computer software**

Expenditures relating to computer software that are not an integral part of the related hardware are capitalised. The original cost of computer software is the total cost incurred by the Group up to the time the software is put into use.

Computer software is amortized using the straight-line method over 02 - 05 years.

##### **\* Land use rights**

Land use rights are all actual costs that the Company has spent directly related to the land used, including: money spent to obtain land use rights, costs for compensation, site clearance, site leveling, registration fees... Land use rights are depreciated using the straight-line method according to the land use term stated on the land use right certificate, land use rights with indefinite term are not depreciated.

#### **IV.12 Construction in progress**

Construction in progress reflects costs directly related (including related interest expenses in accordance with the Group's accounting policies) to assets under construction, machinery and equipment being installed for production, leasing and management purposes as well as costs related to repairs of fixed assets in progress. These assets are recorded at original cost and are not depreciated.

#### **IV.13 Business combination and goodwill**

Business combinations are accounted for using the purchase method. The cost of a business combination comprises the fair value, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the Group, in exchange for control of the acquired entity, and any costs directly attributable to the combination. The assets acquired, identifiable liabilities, and contingent liabilities assumed in a business combination are measured at their fair values at the date of acquisition.

For a multi-period business combination, the cost of a business combination is the sum of the cost of the investment at the date of acquisition plus the cost of previous investments reassessed at their fair values at the date of acquisition. The difference between the revaluation price and the cost of the investment is recognised in the income statement if, before the date of obtaining control, the Group did not have significant influence over the subsidiary and the investment is presented under the cost method. If, before the date of obtaining control, the Group had significant influence and the investment is presented under the equity method, the difference between the revaluation price and the value of the investment under the equity method is recognised in the income statement and the difference between the value of the investment under the equity method and the cost of the investment is recognised directly in the item "Retained earnings" in the Consolidated Balance Sheet.

The excess of the cost of the business combination over the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities recognised at the date of obtaining control of the subsidiary is recognised as goodwill. If the Group's share of the fair value of the identifiable assets, liabilities and contingent liabilities recognised at the date of acquisition exceeds the cost of the business combination, the difference is recognised in the income statement.

Goodwill is amortised on a straight-line basis over 10 years. When there is evidence that the impairment of goodwill is greater than the amortisation, the amortisation during the period is the impairment incurred.

The non-controlling interest at the date of the initial business combination is determined based on the non-controlling interest's share of the fair value of the assets, liabilities and contingent liabilities recognised.

#### **IV.14 Payables and accrued expenses**

Payables and accrued expenses are recognized for amounts to be paid in the future related to goods and services received. Accrued expenses are recognized based on reasonable estimates of the amount to be paid

The classification of payables as trade payables, accrued expenses and other payables is made according to the following principles:

- Trade payables reflect commercial payables arising from the purchase of goods, services, assets and the seller is an independent entity from the Group.
- Accrued expenses reflect payables for goods and services received from the seller or provided to the buyer but not yet paid due to lack of invoices or insufficient accounting records and documents, and payables to employees for vacation wages, production and business expenses that must be accrued in advance.
- Other payables reflect non-commercial payables, not related to the purchase, sale, or provision of goods and services.

Liabilities and payables are classified as short-term and long-term on the Consolidated Balance Sheet based on the remaining term at the end of the accounting period.

#### **IV.15 Owners' equity**

##### ***Owners' capital contribution***

Owner's capital contribution is recorded according to the actual capital contributed by the Company's shareholders.

##### ***Share premium***

Share premium is recorded according to the difference between the issue price and the par value of shares when first issued or issued additionally, the difference between the reissue price and the book value of treasury shares and the capital component of convertible bonds at maturity. Direct costs related to the additional issuance of shares and the reissuance of treasury shares are recorded as a decrease in share premium.

#### **IV.16 Profit distribution**

Profit after corporate income tax is distributed to shareholders after setting aside funds in accordance with the Company's Charter as well as the provisions of law and approved by the General Meeting of Shareholders.

The distribution of profits to shareholders takes into account non-monetary items in undistributed profit after tax that may affect cash flow and the ability to pay dividends such as interest from revaluation of assets contributed as capital, interest from revaluation of monetary items, financial instruments and other non-monetary items.

Dividends are recognized as liabilities when approved by the General Meeting of Shareholders.

#### **IV.17 Revenue and income recognition**

##### ***Revenue and income recognition***

Revenue from the sale of goods and finished products

- The Group has transferred to the buyer the significant risks and rewards of ownership of the goods and products.
- The Group no longer retains control over the goods and products as the owner of the goods and products or the right to control the goods and products.
- The amount of revenue is measured reliably. When the contract stipulates that the buyer has the right to return the purchased goods and products under specific conditions, revenue is recognised only when those specific conditions no longer exist and the buyer is not entitled to return the goods and products (except in cases where the customer has the right to return the goods and products in exchange for other goods and services).
- The Group has or will obtain economic benefits from the sale transaction.
- Identify the costs associated with a sales transaction.

##### ***Revenue from rendering services***

Revenue from rendering of services is recognised when all of the following conditions are met:

- The amount of revenue can be measured reliably. When a contract stipulates that the buyer has the right to return the purchased services under specific conditions, revenue is recognised only when those specific conditions are no longer present and the buyer does not have the right to return the services provided.
- It is probable that the economic benefits associated with the transaction will flow to the Group.
- The stage of completion of the transaction at the reporting date can be measured reliably.
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

In case the service is performed over several periods, the revenue recorded in the period is based on the results of the work completed at the end of the accounting period.

##### ***Interest***

Interest is recognized on the basis of time and the actual interest rate for each period.

##### ***Dividends and distributed profits***

Dividends and distributed profits are recognized when the Group has received the right to receive dividends or profits from capital contributions. Dividends received in the form of shares are only tracked by the number of shares increased, not the

#### **IV.18 Borrowing costs**

Borrowing costs include interest and other costs incurred in connection with borrowings.

Borrowing costs are recognized as expenses when incurred. In cases where borrowing costs are directly related to the investment in construction or production of an unfinished asset that requires a sufficient period (over 12 months) to be put to use for the intended purpose or sale, these borrowing costs are included in the value of that asset. For loans specifically for the construction of fixed assets, investment real estate, interest is capitalized even if the construction period is less than 12 months. Income arising from temporary investment of loans is recorded as a reduction in the original cost of the related asset.

For general borrowings used for the purpose of investing in construction or production of unfinished assets, the capitalized borrowing costs are determined according to the capitalization rate for the weighted average cumulative costs incurred for the investment in basic construction or production of that asset. The capitalization rate is calculated according to the weighted average interest rate of the outstanding loans in the year/period, except for separate loans serving the purpose of forming a specific asset.

#### **IV.19 Expenses**

Expenses are amounts that reduce economic benefits and are recognized at the time the transaction occurs or when it is relatively certain that it will arise in the future, regardless of whether money has been spent or not.

Expenses and the revenues they generate must be recorded simultaneously according to the matching principle. In cases where the matching principle conflicts with the prudence principle, expenses are recorded based on the nature and provisions of accounting standards to ensure that transactions are reflected honestly and reasonably.

#### **IV.20 Corporate income tax**

Corporate income tax expense comprises current income tax and deferred income tax.

##### *Current income tax*

Current income tax is the tax that is calculated on taxable income. Taxable income differs from accounting profit due to adjustments for temporary differences between tax and accounting, non-deductible expenses as well as adjustments for non-taxable income and losses carried forward.

##### *Deferred income tax*

Deferred income tax is the income tax payable or recoverable as a result of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the tax base. Deferred income tax liabilities are recognised for all taxable temporary differences. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences can be utilised

The carrying amount of deferred income tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised. Previously unrecognised deferred income tax assets are reviewed at the end of each reporting period and recognised when it is probable that sufficient taxable profit will be available against which the unrecognised deferred income tax assets can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability settled, based on tax rates that have been enacted or substantively enacted by the end of the reporting period. Deferred tax is recognised in the income statement and is dealt with directly in equity except when it relates to items charged or credited directly to equity.

Deferred tax assets and liabilities are offset when:

- The Group has a legally enforceable right to set off current tax assets against current tax liabilities; and
- The deferred tax assets and liabilities relate to income taxes levied by the same tax authority:
  - For the same taxable entity; or
  - The Group intends to settle its current income tax liabilities and current income tax assets on a net basis or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred income tax liabilities or deferred income tax assets are expected to be settled or recovered.

#### **IV.21 Related parties**

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence.

In considering a related party relationship, attention is paid more to the substance of the relationship than to the legal form.

#### **IV.22 Segment reporting**

A business segment is a distinguishable component that is engaged in providing products or services and that is subject to risks and returns that are different from those of other business segments.

A geographical segment is a distinguishable component that is engaged in providing products or services within a particular economic environment and that is subject to risks and returns that are different from those of segments operating in other economic environments.

Segment information is prepared and presented in accordance with the accounting policies adopted for the preparation and presentation of the Group's consolidated financial statements.

-----  
*Can Tho, Jan 30, 2026*

*Regarding the explanation for the  
fourth quarter of 2025 consolidated  
financial statements*

**To: State Securities Commission of Vietnam;  
Hanoi Stock Exchange.**

Pursuant to Circular No. 96/2020/TT-BTC dated November 16, 2020 of the Ministry of Finance guiding information disclosure on the stock market, SADICO Can Tho Joint Stock Company shall disclose information on the Consolidated Financial Statements (BCTC) for the fourth quarter of 2025 as follows:

Persuant to the Report on production and business performance in the fourth quarter of 2025 Consolidated Financial Statement of Sadico Can Tho Joint Stock Company.

- According to the fourth quarter of 2025 Consolidated Financial Statements, the return after tax in the income statement of the reporting period is a profit, resulting in a change of over 10% compared to the same period report last year (Details in Table 1).

\* Explanation: Under fierce competition pressure, supply exceeding demand, and decreasing revenue, the company increased sales discounts, resulting in a decrease in after-tax profit in the reporting period compared to the same period in 2024.

We commit that all the information above is true and take full legal responsibility for the content of the published information.
